

IN THE CLAIMS

Please substitute the following amended claims for corresponding claims previously presented. A copy of the amended claims showing current revisions is attached.

A<sup>2</sup> 5. A gear change mechanism according to claim 1 wherein the cylinder means, shaft and piston means provide four chambers within the cylinder means and each chamber is connectable to a source of pressure fluid, connection being selectable to effect movement of the shaft to any one of said positions.

A<sup>3</sup> 8. A gear change mechanism according to claim 5 comprising inlet means for admitting pressure fluid to said chambers fluid being admitted to said first pair of chambers to locate said shaft in an intermediate position. fluid being admitted to one of said second pair of chambers to move the shaft towards one or other end of the cylinder means.

9. A gear change mechanism according to claim 5 comprising two fluid control valves selectively operable to admit fluid to the chambers and thereby move the shaft towards one of the end positions, or to the intermediate position.

A<sup>4</sup> 14. A gear change mechanism according to claim 6, wherein the annular pistons are each located about an associated, reduced-section portion of the shaft, and

Serial No. unknown

a4 each piston is movable axially of the shaft in limited extent which is defined by the length of the reduced-section portion.

---

a5 16. A gear change mechanism according to claim 1 wherein the shaft is movable towards one end of the cylinder means by the admission of fluid to one of the pair of first chambers situated at the opposite end of the shaft to said one end, to provide two end positions of the shaft.

---

a6 18. A gear change mechanism according to claim 6 wherein the shaft is movable towards one of said two intermediate positions by admitting fluid to both said first chambers.

---

a7 20. A gear change mechanism according to claim 10 wherein two fluid control valves control the movement of the shaft to the end positions and the two intermediate positions.

---
